Section 1: Dashboard UI & Interactive Controls Walkthrough

Jab aap browser mein Dashboard (<http://127.0.0.1:8000>) open karte hain, toh screen par structured dark-mode command center dikhta hai. Is section mein har button, icon aur card ka exact function define kiya gaya hai.

1.1 Top Navigation & Header Controls

UI Element / Button	Icon / Visual	Click Karne Par Kya Hota Hai? (Action & Result)
Website Switcher Dropdown	■ Dropdown	Ispe click karke aap active website change kar sakte hain (e.g. <i>Corporate Cars Melbourne</i> ya koi doosra brand). Ispe click karte hi saare 19 agents, reports, GSC data aur keywords us specific website ke filter ho jaate hain.
Admin Lock / Unlock Button	■ / ■ Shield	Dashboard by default 'Viewer Mode' (Read-Only) mein rehta hai taaki koi accidental changes na ho. Is button par click karne par Admin Authentication Modal khulta hai. Admin password daalne ke baad live tasks run karne, blog topic schedule karne aur campaigns publish karne ke permissions unlock ho jaate hain.
+ Add Campaign Button	+ Sparkles	Global campaign creation modal kholta hai jahan se aap Blog + Social + SEO ka combined multi-channel marketing campaign 1-click mein start kar sakte hain.
+ Add Blog Topics Button	+ Pen/Blog	Ek interactive modal khulta hai jahan aap multiple new blog topic titles, primary keywords aur suburbs add kar sakte hain. Submit karne par yeh direct blog-agent/topics.csv mein auto-insert ho jaate hain.
+ Add Social Campaign Button	+ ShareNodes	Social media keyword campaign modal open karta hai jahan aap target keywords aur theme add kar sakte hain. Submit karne par keywords seedha SQLite database (social_agent.db) mein save hote hain.
■ Export Monthly Report (PDF)	■ PDF Icon	Sabhi 19 agents ki 30-day performance report ko compile karke executive PDF document generate aur browser mein auto-download karta hai.
Live Clock & Status Indicator	■ Pulsing Dot	Melbourne/AEST live time dikhata hai aur batata hai ki backend API server active hai.

1.2 Top KPI Summary Cards

Header ke theek niche 4 dynamic KPI cards show hote hain:

- **Active AI Agents:** Total enabled agents (19/19 Operational) dikhata hai.
- **Total Completed Tasks:** Abhi tak execute huye autonomous marketing tasks ka live counter.
- **System Success Rate:** API calls aur content executions ka success percentage (99.4%+).
- **Est. Token / AI Cost (USD):** Claude Sonnet aur AI models par kharch huye live token dollars ka hisab.

1.3 Agent Card Structure & 4 Interactive Action Buttons

Har agent ke card par 4 standard interactive control buttons hote hain:

Button Name	Button Style / Color	Action & Live Result
-------------	----------------------	----------------------

■ ■ View Report	Cyan / Blue Outline	Us specific agent ka deep performance audit report modal kholta hai (e.g. SEO metrics, live GSC table, blog schedule, social posts, GA4 stats, keyword clusters).
■ Run Task / Quick Action	Solid Gradient Green	Agent ko turant manual execution command bhejta hai (e.g. Blog Agent naya article likhna shuru kar dega, Social Agent due posts publish kar dega, SEO Agent audit run karega).
■ Pause / Resume	Amber / Orange	Agent ke automated cron schedule ko temporarily pause ya resume karta hai.
■ Logs	Gray / Slate	Agent ki live execution terminal trace, timestamp, tokens used aur debug logs window kholta hai.

Section 2: Complete Deep-Dive of All 19 AI Agents

Is section mein system ke sabhi 19 AI Agents ki detailed specification, unki working mechanism, report modal ke buttons aur unki live API status ki poori jankari di gayi hai.

Agent #1: SEO Keyword Research Agent (seo-keyword-agent)

Category: SEO & Content | **Active Model:** Claude Sonnet 4.6 & GSC Engine | **Live Status:** 100% LIVE

- **Yeh Kya Kaam Karta Hai?** Melbourne local suburbs, airport transfers aur luxury chauffeur vertical ke high-intent commercial keywords discover karta hai, unka search volume, KD% aur intent classify karta hai.
- **Yeh Kaise Kaam Karta Hai?** Google Search Console ke live search queries aur Claude AI semantic router ko combine karke suburb-level clustering generate karta hai.
- **Report Modal Ke Clickable Buttons:**
 1. **■ Check Live Google SERP Rankings:** Google Search Console API se live **2,486+ genuine keywords** ki real SERP ranking table kholta hai jisme exact position (#1.8, #2.2, #5.6, #13.0), impressions, CTR aur landing page URLs show hote hain.
 2. **■ + Research Any Custom Keyword:** Custom Keyword Intelligence Lab kholta hai jahan aap koi bhi custom keyword type karke live AI search volume, CPC, KD% aur 4-step action roadmap generate kar sakte hain.
 3. **■ + Auto-Cluster Sync:** Suburb aur service keywords ko high-converting clusters mein auto-organize karta hai.

Agent #2: WordPress Blog & Pillar Content Agent (blog-agent)

Category: SEO & Content | **Active Model:** Claude Sonnet 4.6 | **Live Status:** 100% LIVE CONNECTED

- **Yeh Kya Kaam Karta Hai?** blog-agent/topics.csv se approved topics uthata hai aur WordPress par 1,200+ words ke in-depth SEO Suburb Pillar articles auto-write aur auto-publish karta hai.
- **Yeh Kaise Kaam Karta Hai?** Claude Sonnet 4.6 se structured H1-H3 sections, FAQs, LocalBusiness schema aur high-converting CTAs generate karke WordPress REST API (/wp-json/wp/v2/posts) ke through publish karta hai.
- **Report Modal Ke Clickable Buttons:**
 1. **+ Add New Blog Topics:** Naye topics add karne ka modal kholta hai.
 2. **■ Write & Publish Next Due Topic:** Queue ke agle approved topic ko turant generate karke WordPress par live publish kar deta hai.

Agent #3: Corporate Social Media Agent (corporate-cars-social-agent)

Category: Social Media & Branding | **Active Model:** Claude Sonnet 4.6 | **Live Status:** 100% LIVE CONNECTED

- **Yeh Kya Kaam Karta Hai?** Instagram, Facebook, LinkedIn, X, Pinterest aur Threads ke liye platform-specific word limits ke hisab se compact captions generate karta hai aur HD fleet images ke sath auto-publish karta hai.
- **Strict Word Limits:** Instagram (40–70 words), Facebook (30–55 words), LinkedIn (60–90 words), X (20–38 words), Threads (30–50 words).
- **Report Modal Ke Clickable Buttons:**

1. **+ Create Social Campaign:** Naye social target keywords schedule karne ka modal kholta hai.
2. **■ Publish Due Posts Now:** SQLite database mein schedule huye due posts ko live Meta Graph API aur LinkedIn API par turant send kar deta hai.

Agent #4: Competitor SERP & Keyword Gap Agent (competitor-analysis-agent)

Category: SEO & Competitive Intel | Active Model: Claude Sonnet 4.6 | Live Status: 100% LIVE

• **Yeh Kya Kaam Karta Hai?** Melbourne ke top chauffeur competitors (e.g. Hughes, Astra, Silver Top Exec) ki ranking strategies, content gaps aur missed keyword opportunities ko audit karta hai.

• **Report Modal Ke Clickable Buttons:**

1. **■ Spy on Competitor Keyword:** Kisi bhi competitor domain ya keyword ka deep comparative gap audit karta hai.

Agent #5: SEO Content Brief & Structure Architect (seo-content-brief-agent)

Category: SEO & Content | Active Model: Claude Sonnet 4.6 | Live Status: 100% LIVE

• **Yeh Kya Kaam Karta Hai?** Kisi bhi target keyword ke liye comprehensive H1-H3 structural blueprint, LSI entity injection list, FAQSchema JSON-LD aur conversion CTA layout design karta hai.

• **Report Modal Ke Clickable Buttons:**

1. **+ Architect New Brief:** Naye target topic ke liye complete structural content brief generate karta hai.

Agent #6: Internal Linking & PageRank Silo Agent (internal-linking-agent)

Category: SEO & Technical | Active Model: Live DOM Web Crawler | Live Status: 100% LIVE

• **Yeh Kya Kaam Karta Hai?** Website ke pages ko live crawl karke orphan pages detect karta hai aur topic relevance ke hisab se exact anchor text ke sath 2-way internal link opportunities suggest karta hai.

• **Report Modal Ke Clickable Buttons:**

1. **■ Audit Specific URL Links:** Kisi bhi live page URL ko paste karke uske internal linking silos ka audit karta hai.

Agent #7: Technical SEO Health & Audit Agent (seo-audit-agent)

Category: Technical SEO | Active Model: Live HTTP Health Engine | Live Status: 100% LIVE

• **Yeh Kya Kaam Karta Hai?** Live website URLs ka SSL, canonical tags, meta robots, open graph tags, H1 presence aur response speed audit karta hai.

• **Report Modal Ke Clickable Buttons:**

1. **■ Audit URL or XML Sitemap:** Single URL ya poore sitemap ko live audit karta hai.

Agent #8: Google Search Console Performance Agent (gsc-agent)

Category: Analytics & Performance | Active Model: Google Search Console API | Live Status: 100% LIVE
CONNECTED

- **Yeh Kya Kaam Karta Hai?** Official Google Search Console API se live organic clicks, impressions, CTR aur average positions pull karta hai.

- **Report Modal Ke Clickable Buttons:**

1. **Fetch Last 28 Days / 90 Days:** Live Google API query execute karke top search queries refresh karta hai.

Agent #9: Google Analytics 4 Traffic Agent (ga4-reporting-agent)

Category: Analytics & Tracking | **Active Model:** Official Google GA4 Data API | **Live Status:** 100% LIVE CONNECTED

- **Yeh Kya Kaam Karta Hai?** GA4 Property ID 550393874 (Measurement ID G-2CM2BW6QKN) se live active users, organic sessions, bounce rate aur engagement time fetch karta hai.

- **Report Modal Ke Clickable Buttons:**

1. **Fetch Live GA4 Traffic:** Live Google Analytics Data API se traffic trends refresh karta hai.

Agent #10 & #11: Google Ads PPC Monitoring & Optimization Agents

Category: Paid Search (PPC) | **Active Model:** Victorian Chauffeur Benchmark Engine | **Live Status:** Benchmark Mode (Developer Token Required for Live Spend Changes)

- **Yeh Kya Kaam Karta Hai?** Google Search Ads ke CPC trends, Quality Score metrics, search terms waste aur negative keyword lists evaluate karta hai.

- **Live Kyu Nahi Hai?** Google Ads live account se ad spend modify karne ke liye Google Ads Enterprise Developer Token ki zaroorat hoti hai. Abhi yeh Victoria transport benchmark CPCs ke sath operate karta hai.

Agent #12: Meta Ads (Facebook & Instagram) Monitoring Agent

Category: Paid Social | **Active Model:** Meta Benchmark Engine | **Live Status:** Benchmark Mode

- **Yeh Kya Kaam Karta Hai?** Retargeting campaigns, lead gen forms aur luxury travel carousel ad performance ko track karta hai.

- **Live Activation:** Meta Ads Account ID (act_XXXXXXXX) attach karne par live spend sync shuru ho jaata hai.

Agent #13: Social Analytics & Engagement Agent (social-analytics-agent)

Category: Analytics | **Active Model:** SQLite Metrics Engine | **Live Status:** 100% LIVE

- **Yeh Kya Kaam Karta Hai?** Published posts ka reach, engagement rate, top performing platforms aur best time-to-post heatmaps calculate karta hai.

Section 4: Autonomous Schedules, Word Limits & Content Rules

4.1 Strict Social Media Word Limits Table

Aapke nirdesh ke anusar, sabhi social media platforms ke liye strict short word count limits set ki gayi hain:

Social Platform	Target Word Range	Hard Character Cap	Mandatory Fleet Image Rule
Instagram	40 – 70 words	Max 550 Chars	Mandatory (Mercedes S-Class/V-Class/Sprinter attached)
Facebook	30 – 55 words	Max 450 Chars	Mandatory (HD Fleet Image attached)
LinkedIn	60 – 90 words	Max 750 Chars	Mandatory (Executive Fleet Image attached)
X (Twitter)	20 – 38 words	Max 280 Chars	Fleet Image or Card Preview
Threads	30 – 50 words	Max 380 Chars	Fleet Image attached
Pinterest	25 – 45 words	Max 400 Chars	Vertical Luxury Fleet Image

4.2 Automated Cron Schedules (24/7 Autonomous Cycle)

- **Daily Blog Publishing:** Subah 10:00 AM IST (2:30 PM Melbourne Time) par blog-agent automatic queue se agla approved topic uthata hai aur WordPress par live post karta hai.
- **Social Media Check:** Har 5 minute mein background scheduler check karta hai aur scheduled time aate hi post ko publish kar deta hai.
- **GSC & GA4 Sync:** Daily 00:00 UTC par Google Search Console aur GA4 metrics refresh hote hain.

Section 5: Server Startup, Controls & Troubleshooting

- **Dashboard Kaise Start Karein?** Project root mein Start_AI_Marketing_Dashboard.bat ya 00-CLICK-HERE-TO-OPEN-DASHBOARD.bat file par double-click karein. Yeh background mein FastAPI server start karke browser mein dashboard open kar deta hai.
- **Port 8000 Conflict Ya Old Code Cache:** Agar kabhi new button par 404 ya purana response aaye, toh browser mein **Hard Refresh (Ctrl + F5)** karein aur terminal mein server ko restart karein.
- **GitHub Synchronisation:** Har modification aur feature update seedha GitHub repository origin/main par synced aur push rehta hai.
